An introduction to our technology In most hematology labs, cell differentials are performed using manual microscopy. But this traditional process is not without its limitations. Our innovative technology replaces manual microscopy and transforms the process of performing blood and body fluid differentials. Learn more > Products . Check the user or service manual for more information. Some manufacturers recommend a weekly self-test and in many hospital in the developed world the self-test has to be done even on a daily base. In many hospitals in the developing countries the defibrillator is rarely or never used. Thus hardly anyone knows the self-test function. Discuss this topic with the responsible doctors and offer ...
